

Future Trials for Osteosarcoma-What next?

Neyssa Marina, MD
Professor of Pediatrics
Stanford University

EURAMOS - Background

- Survival for non-metastatic osteosarcoma has reached a plateau
- Detection of treatment differences requires large patient accrual
- EURAMOS – 4 collaborative groups

◆ COSS

◆ EOI

◆ SSG

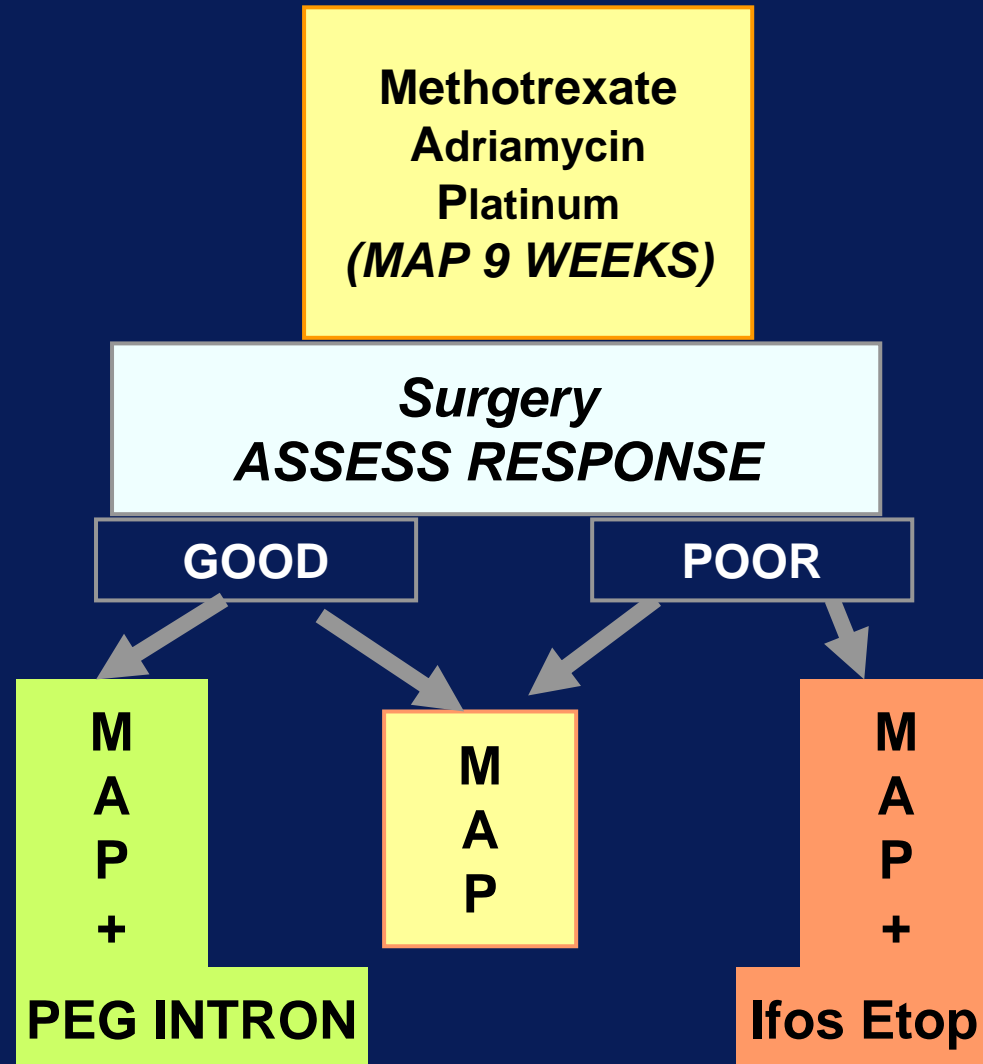

◆ COG

E UROPEAN
O STEOSARCOMA
I NTERGROUP

EURAMOS: Objectives

- Determine whether the addition of IE to MAP improves EFS & OS for poor responders?
- Determine whether the addition of PEG-Intron as maintenance improves EFS & OS for good responders?

EURAMOS I Status

- **Accrual : 1600 patients**
- **Anticipate completion Fall 2010**
- **Where do we go from here?**

EURAMOS-Meeting Purpose

- Discuss ideas for future collaborative trials
- Re-establish collaboration
- Extend collaborative efforts to other interested groups

EURAMOS Meeting

- Welcome !
- Open forum for discussions
 - ◆ Ideas for trials
 - ◆ Collaborative agreements

EURAMOS

- **Goal:**
 - ◆ **Have an idea of potential study questions**
 - ◆ **Have an idea of interested collaborators**
